

What is Feng Shui

The basic philosophy of Feng Shui is that everyone and everything in our surroundings is connected with a life-force energy.

Feng Shui is an Asian term for this science and methodology that is used all over the world.

Feng Shui reveals the harmony/disharmony, balance/imbalance and benefits/challenges in our environment. You can direct the energy from these areas to benefit your life. Good Feng Shui maximizes your potential for health, wealth and relationships.

Feng Shui is related to the very sensible notion that living with, rather than against nature, benefits both humans and our environment. It also demonstrates that our lives are deeply affected by our physical and emotional energies.
